Acting Chief Technology Officer

As the Acting Chief Technology Officer at VisionBank, I drive digital transformation by fostering innovation and evaluating emerging technologies to implement new products and operational efficiencies.

My leadership is focused on cultivating a collaborative and high-performance work culture among diverse, cross-functional teams.

Driving cost-efficiency is a core responsibility, achieved through the strategic allocation of technology budget and the implementation of solutions that optimize performance and security.

Education

Master 2 Software Engineer

Université de Versailles - Paris - France - From September 2007 to November 2010

Bachelor Software Engineer

Philadelphia University - Amman, Jordan - From September 2004 to July 2007

Work experience

Acting Chief Technology Officer

VisionBank - Riyadh, RI, Saudi Arabia (Hybrid) - Since January 2022

■ Acting Chief Technology Office

- **Aligning Technology with Business Goals:** Translating the bank's vision for growth and customer service into a concrete technology roadmap.
- **Driving Digital Transformation:** Leading initiatives to build and mature the bank's digital capabilities, Multi-Cloud, Customer Centric, cost efficient and cloud-native architecture.
- **Fostering Innovation:** Scouting and evaluating emerging technologies like AI and big data to implement new products, services, and operational efficiencies.
- **Fostering a High-Performance Culture & Cross-Functional Collaboration:** Cultivating a collaborative and agile work environment that encourages innovation, continuous learning, and ownership.
- **Budget Development and Management:** Creating and managing technology budgets, ensuring resource allocation is aligned with strategic priorities, reduce operational costs while enhancing performance and security

■ IT Platform Director (Reporting to the Acting Chief Technology Office)

- **Define and implement the comprehensive platform strategy:** ensuring alignment with key organisational objectives and adherence to the SAMA regulatory framework.
- **Oversee the development** and optimisation of IT infrastructure, encompassing both cloud and on-premise environments, to guarantee reliability, scalability, and security.
- **Leadership and Mentoring:** Lead and mentor diverse, cross-functional teams, including platform engineers, SREs, Network engineers, and support staff, cultivating a collaborative and high-performance work culture.
- **Financial Management:** Develop and manage budgets, strategically allocating resources to ensure the cost-efficient operation of the platform.

■ Head of Platform

- **Leadership:** Lead and built a team of 25+ DevSecOps and Cloud Engineers to build and maintain the bank infrastructure and set out best practices (Multi-Cloud, Customer Centric)
- **Collaboration:** Collaborate with various stakeholders to develop policies, standards, gouvernance for SAMA ITGF, PDPL, PCI/DSS and EY Audits.
- **Accountability:** Accountable for the resilience and readiness of the IT Platform
- **Communication:** Regularly update Senior Leadership on the progress of key projects and the corrective actions taken after production incidents and outages.

■ Principal DevSecOps Eng'

- **Responsibility:** Responsible for the microservice deployment, configuration and maintenance on Kubernetes, Kong API Gateway, Istio Service Mesh, Gitops Model
- **Design and implement** microservices CI/CD
