PROFESSIONAL EXPERIENCE

07/2025 – Present

STC Bank

Head of Technology Governance

- Lead the Technology Governance function, defining operating model, decision rights, and committee structures across IT.
- Own end-to-end regulatory alignment for Technology, maintaining ML3 compliance with SAMA ITGF and overseeing closure of all audit and supervisory observations.
- Oversee Technology performance management, including KPI framework design, threshold governance, and executive reporting to senior management and ITSC.
- Establish and enforce structured IT process management standards, ensuring clear ownership, accountability, and measurable control effectiveness.
- Centralize regulatory and control evidence management, strengthening audit readiness and supervisory response capability across Technology.

09/2023 – 06/2025

Saudi Awwal Bank (SAB)

IT Governance Manager

- Ensure full compliance with SAMA ITGF by managing over 1,000 pieces of evidence and addressing all regulatory requirements.
- Develop and track KPIs to improve SLA adherence and provide clear performance insights for decision-making.
- Contribute to cost-saving initiatives through careful review of IT contracts and process improvements.
- Lead the experimental phase of an SME microloan project, approved by the board to support small businesses.
- Support team development by mentoring and collaborating to achieve shared goals.
- Streamline internal processes to reduce delays and improve task efficiency across key IT functions.
- Maintain strong communication with regulators and senior leadership to ensure clear alignment and timely compliance.
- Enhance procurement processes by recommending practical solutions and identifying cost-effective opportunities.
- Provide clear and actionable updates for IT Steering Committee discussions to support effective decision-making.
- Recommend process automations to simplify workflows and improve efficiency where feasible.

03/2023 – 09/2023

Bank Albilad

Senior IT Governance Officer

- Led monthly executive-level presentations on SAMA IT Governance updates, translating complex regulatory requirements into actionable strategic insights for the IT Steering Committee (ITSC). Provided clear recommendations for alignment with governance frameworks
- Collaborate with ITSC members to develop and implement action plans
- Collaborate with internal auditors to identify areas of non-compliance and develop remediation plans to address them
- Coordinate with external auditors to ensure compliance with regulatory requirements and provide necessary documentation and reports

- Assist internal and external auditors in performing their audits by providing necessary information and facilitating interviews with relevant staff
- Respond to audit findings and recommendations in a timely and effective manner, and implement corrective actions as necessary
- Manage and monitor the implementation of IT projects to ensure compliance with SAMA's IT governance requirements
- Work closely with the bank's senior management to identify strategic IT initiatives and align them with SAMA's IT governance framework
- Provided strategic recommendations and advisory on IT governance and compliance, leading to improved regulatory alignment and operational efficiencies.

09/2021 – 03/2023

Alwatania Information Systems

Acting IT Operation Manager

- Drives implementation and execution of IT governance principles and framework
- Advised and led the digital transformation initiative to transition 4 departments to a fully paperless environment through the implementation of an electronic signature system. This optimized operational efficiency and reduced costs
- Strengthened daily operations of network and server infrastructure achieving 99% uptime
- support, manage, and administer contracts for software and application services and products across the organization
- Providing training to users on how to use Office 365 effectively
- Facilitate training and adoption of new Microsoft 365 solutions and processes including delivery & creation of training plans, materials, and documentation
- Explore ways to scale Microsoft's offering, such as with the Power Platform, within the organization based on business opportunities to help create 6 automated requests by the support services dept
- Developed and implemented an IT governance framework, increasing policy adoption by 70% and ensuring alignment with industry best practices, improving overall organizational governance and compliance
- Approach to solving complex problems by using ITIL 7 guiding principles (Specifically "focus on value")
- Managing IT budget (of 6 Million Saudi Riyal), forecasting, handling cash flow, and enforcing cost-effectiveness by reviewing the invoices quarterly
- Implementing the end-to-end change lifecycle effectively by recording version history and assigning accountabilities of each change reviewed every 6 months
- Directed teams to document every change request and adhere to quality standards
- assessing new and replacement hardware needs aligning with HR forecast on a half-year basis
- Developed an ordering system for the company's cafeteria, used instead of an outsourced system that would cost 19K (SR)
- Understand business problems, analyze the need and devise change strategies to create more than 4 automated workflows
- JIRA/ Agile/ ITIL/ IT Service Management Tools
